

eSTOP™ Lantern Battery Car Charger

Input socket: Vehicle Cigarette Lighter Aux

Input voltage: DC 10-28V 5A

Output voltage: DC 15V

Output current: 3A

Output power: 45W

Conversion efficiency: $\geq 88\%$

Green light < 300mA

Protective function: short circuit, open circuit, over voltage, over current protection.

One-year warranty

Product Certifications:

UL, CUL, CE, GS, CB, BS, SAA, FCC, ROHS

Operations:

Red LED: Charging

Green LED: Charge complete

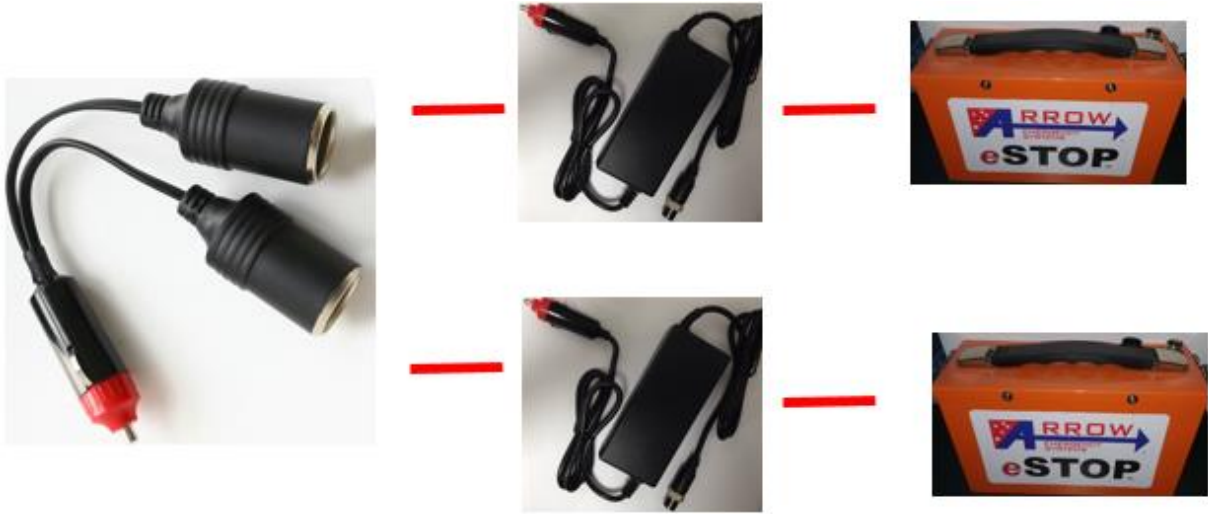

Charging time: 7 hours to fully charge (1 at a time only) 21A eSTOP Lantern Battery

Dual battery charging requires 2 eSTOP™ Lantern Battery Car Charger, below is the 2 options available.

eSTOP™ Spec Sheet

Option 1: Single cigarette plug to double cigarette socket, make vehicle cigarrate output is 10A, 12V.

Option 2: Double cigarette socket where input connects directly to a battery with fuse holder, make sure fuse is 10A, battery is 12V.
