

Heavy duty traffic control ute fit-outs

Well designed and manufactured, our ute tray fit-outs are seriously strong yet light weight.

Arrowes provides end-to-end solutions for standardised and custom ute fit-outs. Leveraging our in-house engineering, bodybuilders, boilermakers and auto-electrical teams we can provide any design and fit-out required.

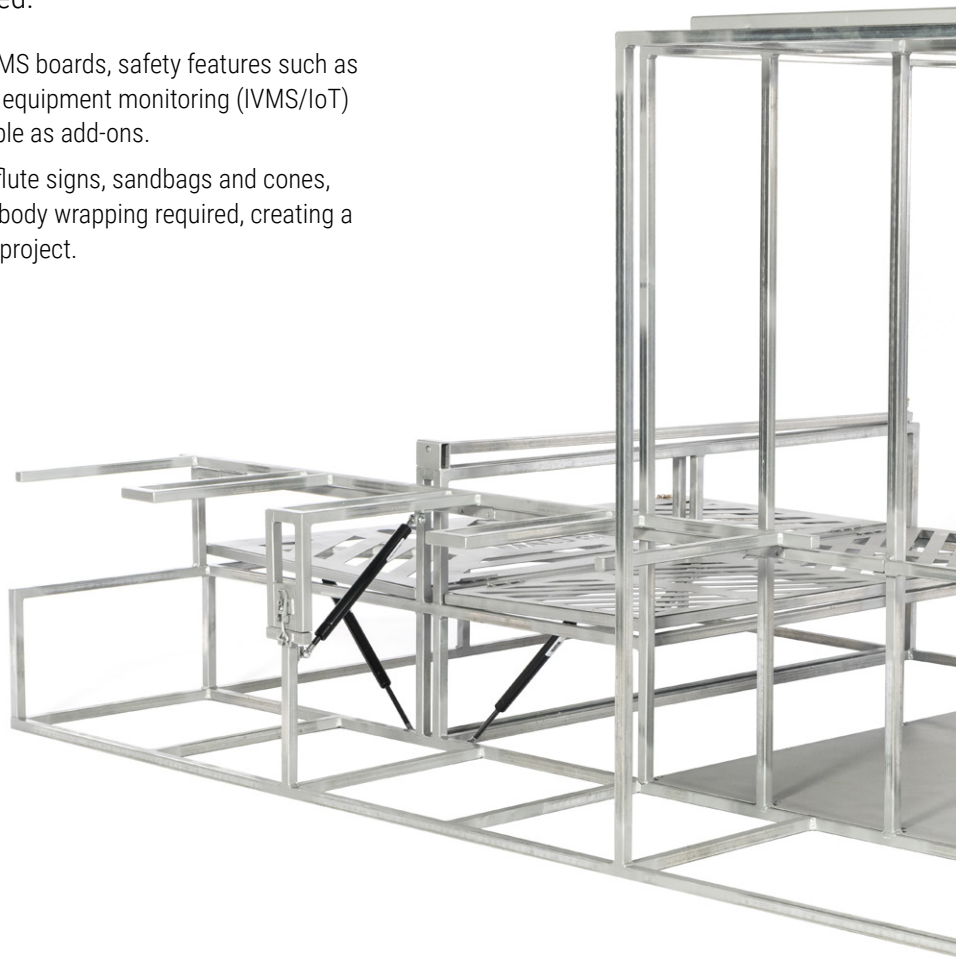

In addition to our locally made Arrow and VMS boards, safety features such as dash cams, DVRs, MINE Specs, vehicle and equipment monitoring (IVMS/IoT) and solar/battery enhancements are available as add-ons.

For fleets requiring a fit-out inclusive of corflute signs, sandbags and cones, we are able to provide these as well as any body wrapping required, creating a complete vehicle ready to be driven to your project.

Increased payload

Long term durability

**Numerous layout options
including a set-up suitable
across all Australian states**

Options

Arrow Board: Add any size Arrow Board from our full range manufactured in-house.

VMS Boards: Add any size VMS Board from our full range manufactured in-house.

Secure Cage: Customised secure cages with multiple storage options and add-on features including gas-struts to prevent hand injuries.

Solar & Battery: Solar and Battery power for VMS- and Arrow Boards for reduced Carbon Footprint and reduced Fuel consumption.

IP65 rated Tablet Control: Wireless control of VMS- and Arrow Boards via a Windows based tablet made for harsh environments.

Dash Cam: Professional dash cams for high resolution and wide angle video footage as well as separate storage of event triggered recordings to avoid accidental removal.

Oversized Sign: Add signage for Pilot Vehicles.

eSTOP compartment: Secure cages customised to fit eSTOP cases with space efficient, safe and easily accessible storage.

Add on accessories: Enhance your ute with work lights, beacons, cameras or DVR recording. Please visit our website for details.

Quality Australian manufacturing.

Our manufacturing facilities are closely embedded into the local and regional supply chain and ecosystem. Arrowes sources as many components, parts and supplies as possible from our Queensland and Australian suppliers. We support the local business community and ensure our close connections benefit our clients in terms of response times, quality and service.
